## KTM RC8 2008-13

### 1) Ignition coils

Disconnect black connector from ignition coil on rear cylinder and insert QS wiring harness.  
Do it same with ignition coil on front cylinder.

### 2) Injectors

Disconnect black connector from injector on rear cylinder and insert QS wiring harness.  
Do it same with injector on front cylinder.

### 3) Ground connection

Connect black wire of QS to negative terminal of battery (or to frame of motorcycle)

### 4) QS sensor

Connect QS sensor to QS wiring harness - black 2 pin connector.

### 5) Gear pos. sensor

If bike has Gear position sensor join Pink wire from QS wiring harness with output wire from Gear position sensor. It is not necessary.
